About Me

AWS Certified Developer – Associate and RHCSA-certified Computer Science student specializing in cloud-native backend systems, serverless architectures, and AWS services. Experienced in building scalable applications using Python, FastAPI, Docker, and event-driven architectures with hands-on deployment experience.

Technical Proficiencies

- **Cloud & DevOps:** AWS (Lambda, Step Functions, API Gateway, DynamoDB, S3, Cognito, Bedrock, Comprehend, SQS/SNS, EC2), GCP, Docker, Terraform
- **Architecture & Practices:** Serverless, Microservices, Event-Driven Architecture, REST APIs, JWT/RBAC Authentication, CI/CD, Infrastructure as Code (IaC)
- **Languages:** Python, Java, C++, C, SQL, HTML/CSS
- **Tools & Systems:** Git, GitHub, Postman, Linux (RHCSA), Networking; familiar with Kubernetes, Jenkins, Ansible, Selenium

Experience

AWS Development with DevOps Trainee — Technical Hub Pvt Ltd May 2025 – June 2025

- Deployed a 2-tier client-server architecture on AWS using EC2 instances and NGINX reverse proxy.
- Designed VPC architecture with public/private subnets, route tables, and security groups.
- Configured IAM roles and policies to enable secure server-to-server communication.

Projects

CloudSentinel AI — Multi-Cloud Security & GenAI Platform — AWS Step Functions, Lambda, Groq, Bedrock, DynamoDB, Cognito, Comprehend, GCP, Terraform [GitHub Repository](#)

- **Problem:** Cloud-security tools flood teams with context-free alerts and scan domains sequentially, delaying detection and remediation.
- **Solution:** Built a serverless platform running five domain scanners in parallel via Step Functions ($3.47\times$ faster than sequential), with a Groq-hosted Llama 3.3 model generating grounded, plain-language remediation under a zero-trust IAM model; a live AWS scan reached 96.6% precision (84/87 findings, zero AI hallucinations).

AWS Cloud-Native Blog API — FastAPI, Lambda, Docker, RDS, SQLAlchemy [GitHub Repository](#)

- **Problem:** Inefficient ORM queries caused high latency due to the N+1 query issue in relational data retrieval.
- **Solution:** Developed a containerized FastAPI application deployed on AWS Lambda with RDS, optimizing relational queries using SQLAlchemy eager loading to reduce database round-trips by 80%.

HireFusion AI — AWS Lambda, S3, API Gateway, DynamoDB, Textract, Rekognition, Transcribe, Comprehend [GitHub Repository](#)

- **Problem:** Resume screening and interview evaluation require significant manual effort and lack consistency at scale.
- **Solution:** Built an event-driven serverless system using S3-triggered Lambda functions integrating Textract, Rekognition, Transcribe, and Comprehend, with results stored in DynamoDB and exposed via API Gateway.

Coding Portfolio

- **LeetCode:** Solved 200+ Problems – leetcode.com/u/sayyadsameerm3
- **HackerRank:** 4-Star (C, SQL, Problem Solving), 3-Star (C++, Python, Java) – hackerrank.com/sayyadsameerm3
- **CodeChef:** 2-Star Coder – [codechef.com/users/sayyadsameer](https://www.codechef.com/users/sayyadsameer)
- **GeeksForGeeks:** Solved 100+ Problems – [geeksforgeeks.org/user/sayyadsameer](https://www.geeksforgeeks.org/user/sayyadsameer)

Certifications

- **AWS Certified Developer – Associate** – Amazon Web Services
- **Red Hat Certified System Administrator (RHCSA)** – Red Hat
- **Oracle Cloud Infrastructure (OCI) Architect Associate** – Oracle
- **Oracle Certified Java Foundations Associate** – Oracle
- **HTML & CSS Certification** – Certiport

Education

B.Tech, Computer Science & Engineering — Aditya College of Engineering and Technology, Surampalem 2023 – 2027
CGPA: 8.69

Intermediate (MPC) — Sasi Junior College 2021 – 2023
GPA: 9.60
